Pricing Strategy Analysis

Complete workflow — from raw data to revenue-optimizing decisions

Made with GAMMA

STEP 1

Problem Definition

Core Questions

Optimal pricing? Elastic vs inelastic demand? Revenue & profit maximization?

Goals

Maximize revenue · Optimize profit margins

Made with GAMMA

STEP 2

Data Collection

Structured dataset for data-driven pricing decisions

Product Info

Name, Category

Pricing

Unit Price, Cost Price, Competitor Price

Sales

Quantity Sold, Revenue

Elasticity

Price Elasticity metric

Made with GAMMA

STEPS 3–4

Data Cleaning & Feature Engineering

Excel Preprocessing

- Removed missing/null values
- Standardized price formats
- Eliminated duplicates
- Cleaned product/category names

Key Metrics Created

Revenue

Price × Quantity

Profit

Revenue – Cost

Margin %

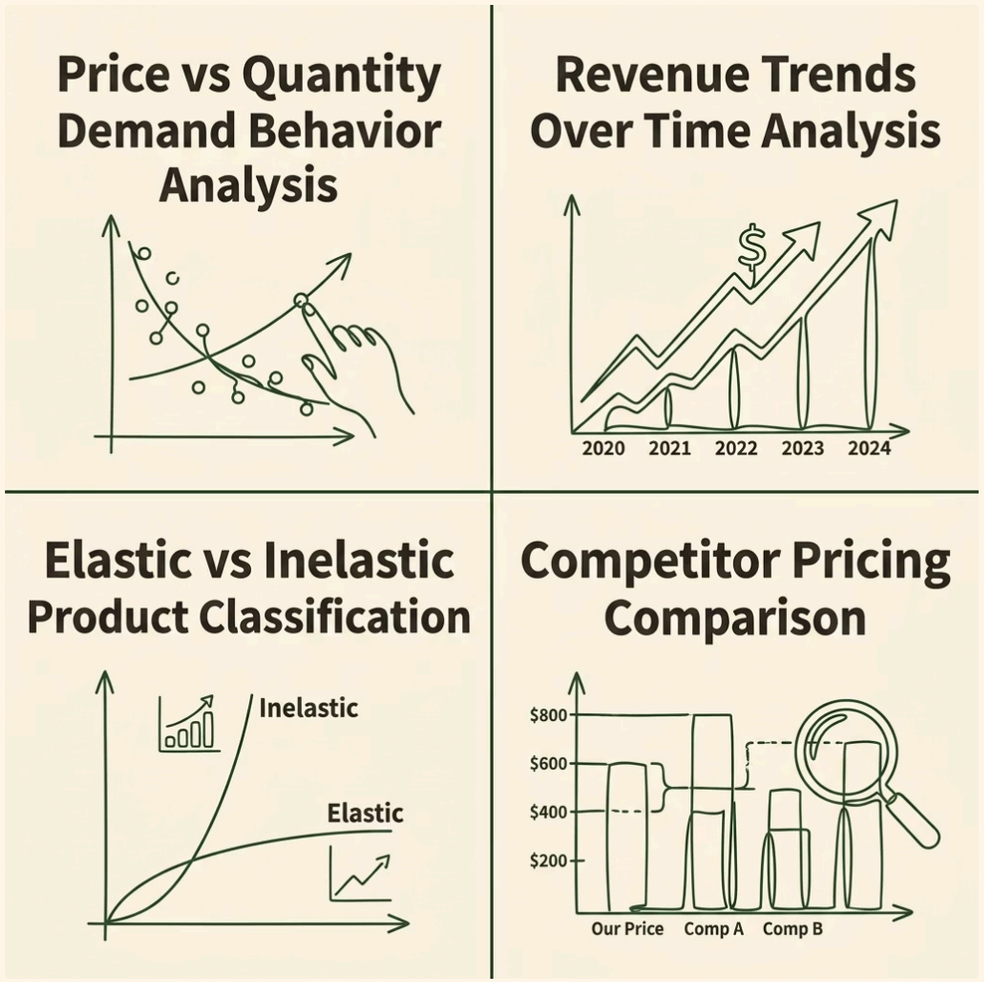
Profit / Revenue

Made with GAMMA

STEP 5

Exploratory Data Analysis

Python (Pandas, Matplotlib) — price behavior, revenue trends, elasticity



→ Price-Sensitive Products

Identified which items respond to price changes

→ Premium Candidates

Products that support higher pricing

Made with GAMMA

STEP 6

Pricing Strategy Design

Discount Strategy

10–15% discount on elastic products (e.g., Wireless Headphones)

Bundle Strategy

Combine products to increase perceived value (e.g., Headphones + Case)

Premium Pricing

Increase price for inelastic products

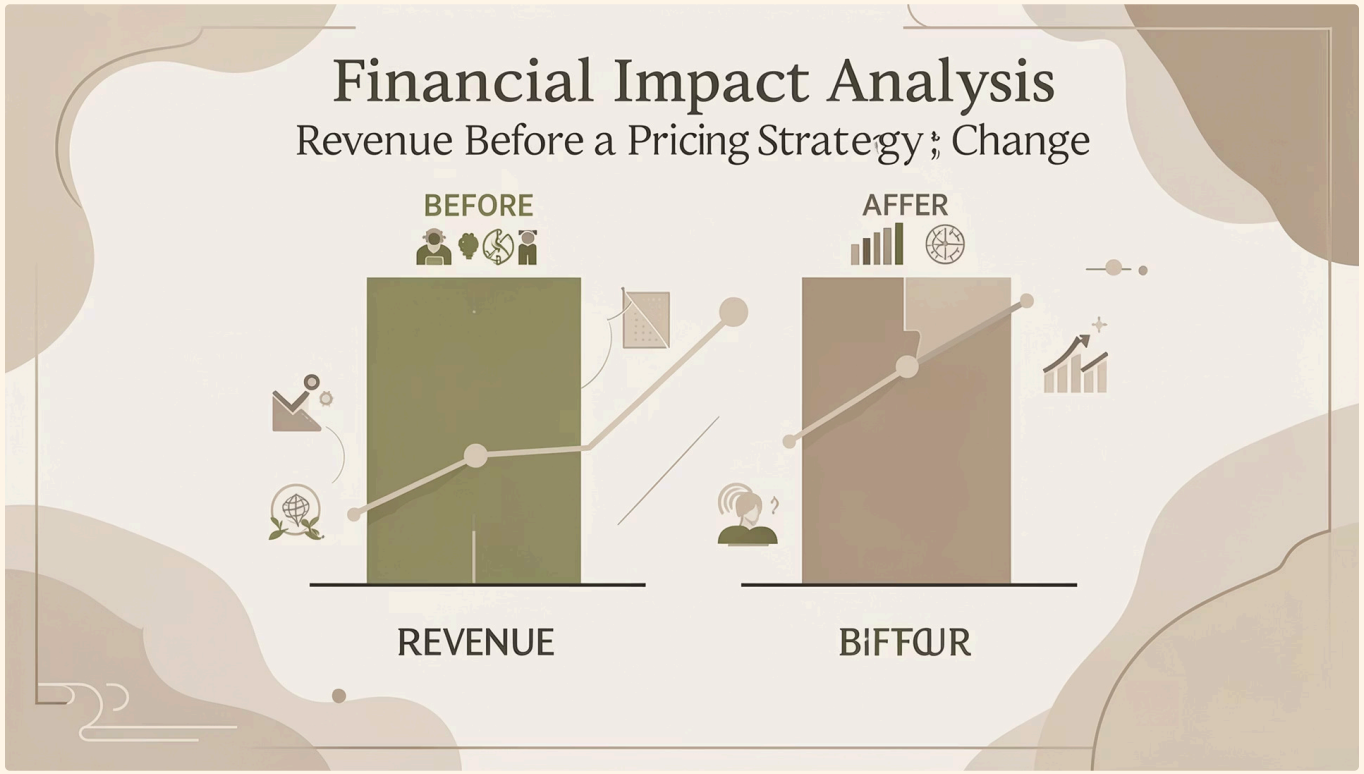
Competitive Pricing

Align pricing with competitors

Made with GAMMA

STEP 7

Revenue Impact Analysis



Measured real business impact of each pricing decision

Current Revenue

Baseline before strategy

Projected Revenue

After applying strategy

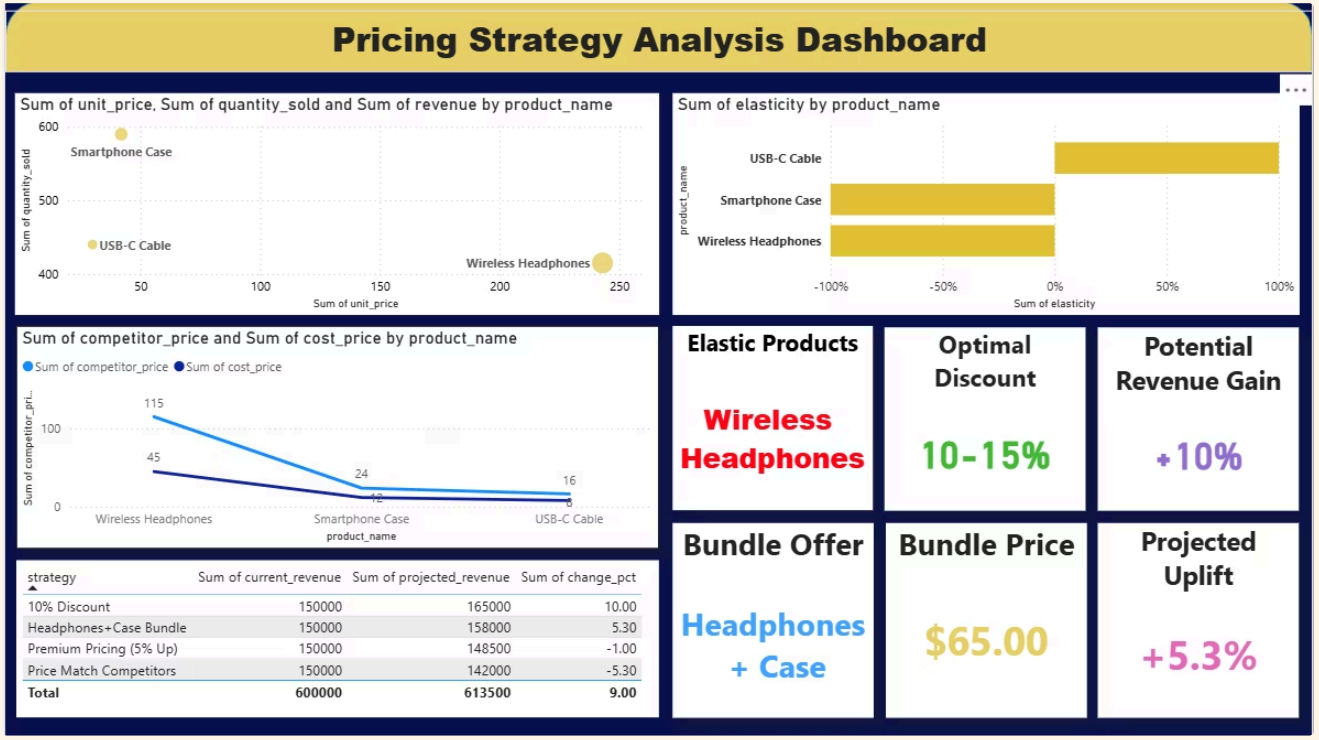
% Change

Effectiveness of each approach

Made with GAMMA

STEP 8

Power BI Dashboard



strategy	Sum of current_revenue	Sum of projected_revenue	Sum of change_pct
10% Discount	150000	165000	10.00
Headphones+Case Bundle	150000	158000	5.30
Premium Pricing (5% Up)	150000	148500	-1.00
Price Match Competitors	150000	142000	-5.30
Total	**600000**	**613500**	**9.00**

KPIs Tracked

- Elastic Products · Optimal Discount
- Potential Revenue Gain
- Bundle Offer & Price · Projected Uplift

Visualizations

- Scatter Plot — Price vs Quantity vs Revenue
- Bar Chart — Elasticity Analysis
- Line Chart — Competitor vs Cost
- Table — Strategy-wise Revenue Impact

Made with GAMMA

STEP 9

Key Insights

Elastic Products

Benefit from targeted discounts

Bundling

Increases overall revenue

Premium Products

Generate higher margins

Competitor Pricing

Significantly influences demand

Made with GAMMA

STEP 10

Recommendations & Workflow Summary

Action Plan

01

Targeted Discounts

02

Promote Bundling

03

Premium Where Stable

04

Monitor Competitors

05

Optimize for Profit

End-to-End Workflow
